years of experience
in improving labor
rights in global supply
chains

200+

businesses advancing
human rights due
diligence strategies

97

countries where we
have implemented
projects

5000+

in-depth assessments
covering core labor
rights

Focus Issues

Forced Labor

Child Labor

Migrant Labor

Workplace Discrimination

Working Conditions

Worker Engagement

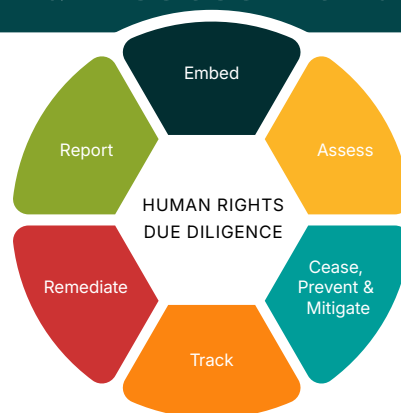

Filling the gap from assessment to action

Verité's Supplier Assessment and Improvement Programs (SAIP) provide comprehensive solutions that address the root cause of issues affecting supply chains. Through combining our in-depth, worker-centric assessments with remediation plans and ongoing improvement programs, our SAIP team implements a holistic approach that empowers businesses with the ability to not only identify problems but also to solve them.

Our vision is a world
where people work
under *safe, fair, and*
legal conditions

Driving Continual Improvement Beyond Assessments

Our workplace assessment methodology goes beyond a standard social audit — with a central focus on ensuring the voices and perspectives of workers are heard and valued. Our comprehensive Human Rights Due Diligence approach builds stronger brand-supplier partnerships that drive continuous improvement in workplace conditions and worker wellbeing.

Assess

We assess human rights risks throughout supply chains and supplier networks, identifying risk factors and ways they can be prevented.

Track

Our supplier and workplace assessments are centered on workers' perspectives, uncovering root causes of labor violations and providing guidance for sustainable change.

Embed

We help integrate human rights respect into management systems, strengthening accountability and aligning codes with international regulations.

Cease, Prevent & Mitigate

We help clients implement corrective action plans, capacity-building training, and build systemic safeguards against future supply chain risks.

Remediate

We help provide remediation to stakeholders when your company has caused or contributed to human rights harms.
